

Introduction to the visual and comment on the visual

The visual itself: a graph

Informative caption: numbered figure, informative title and reference

Figure 2 shows the number of extreme rainfall events with at least 90mm of precipitation over 1000 km² for a 24-hours period in Sweden during last decades. As can be seen, the tendency is slightly increasing since the 70's with the highest number of events reached in the last decade.
